

CRIR M1

Commercial Carbon Dioxide (CO₂) Sensor, 400 ppm to 2000 ppm, up to 10000 ppm Extended Range

DESCRIPTION

The CRIR M1 Commercial Carbon Dioxide (CO₂) sensor is a single channel, non-dispersive infrared (NDIR) sensor. Within the CRIR M1 is a sensing chamber with an infrared source at one end and a detector fitted with an optical filter at the other end. The source emits radiation at wavelengths which include the absorption band of CO₂. The filter blocks wavelengths which are not sensitive to the presence of CO₂, thereby increasing selectivity and sensitivity. As the light passes through the sensing chamber, a fraction is absorbed if CO₂ is present. The difference between the light emitted by the source and received by the detector can then be converted to a CO₂ concentration reading.

The Automatic Baseline Correction (ABC) function can automatically calibrate the sensor's lowest reading over a pre-configured interval to 400 ppm CO₂. This enhances long term stability and may eliminate the need for calibration.

VALUE TO CUSTOMERS

- Small size
- Maintenance free for normal indoor applications
- Enhanced long term stability
- Higher accuracy: ± 40 ppm $\pm 3\%$ of reading
- Consistency and repeatability
- Easy integration

POTENTIAL APPLICATIONS

- HVAC, demand controlled ventilation
- Indoor air quality (IAQ) measurement
- Air purification systems
- Smart /IoT (Internet of Things) systems

FEATURES

- Single channel, non-dispersive infrared technology
- Automatic Baseline Correction
- Temperature compensation
- UART digital interface

COMMERCIAL CARBON DIOXIDE SENSOR, 400 PPM TO 2000 PPM, UP TO 10000 PPM EXTENDED RANGE, CRIR M1

TABLE 1. SPECIFICATIONS

| CHARACTERISTIC | PARAMETER |
|--|--|
| Target gas | carbon dioxide (CO ₂) |
| Operating principle | non-dispersive infrared (NDIR) |
| Standard range ^{1,2} | 400 ppm to 2000 ppm, up to 10000 ppm extended range |
| Measurement interval | 4 s |
| Accuracy ³ | ±40 ppm ±3% of reading |
| Typical response time (T ₉₀) | ≤120 s |
| Sensor warm-up time | 3 min typical |
| Repeatability | >97% |
| Operating voltage | 4.5 V to 5.5 V unprotected against surges and reverse connection |
| Power consumption | 300 mA peak, 30 mA average |
| Alarm output, open collector | 1000 ppm/800 ppm normal state is conducting max 100 mA. Transistor open at CO ₂ high or at sensor failure (see Figure 1). |
| Serial communication ⁵ | UART, Modbus protocol |
| Operating temperature range | 0°C to 50°C |
| Storage temperature range | -40°C to 70°C |
| Operating humidity | 0 %RH to 90 %RH non-condensed |
| Expected operating life | 10 years |
| Maintenance ⁶ | maintenance-free for normal indoor applications |
| Weight | <8 g |
| Dimensions | 33 mm x 22 mm X 11,2 mm (tolerance ±0,5 mm) |

¹ The CRIR M1 is designed to measure CO₂ in the range of 400 ppm to 2000 ppm with the accuracy specified in Table 1; however, exposure to concentrations below 400 ppm may result in incorrect operation of the ABC algorithm and should be avoided when the ABC is ON.

² The CO₂ sensor provides readings via UART in the extended range; however, the accuracy is reduced.

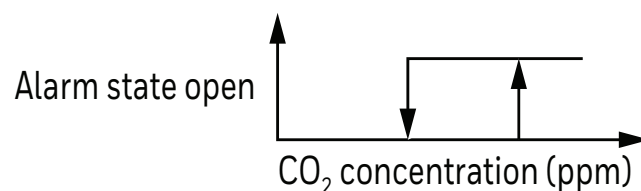

³ In normal IAQ applications, the sensor accuracy is defined after a minimum of three ABC periods of continuous operation.

⁴ The sensor accuracy is specified over the operating temperature range and referenced to certified calibration mixtures. Uncertainty of calibration gas mixtures (±1% currently) is to be added to the specified accuracy for absolute measurements.

⁵ See the CRIR M1 User Guide for Modbus address and parameter definitions.

⁶ The CO₂ sensor normally does not require maintenance in IAQ applications; however, for some industrial applications, maintenance may be required.

TABLE 2. PINOUT

| PIN NUMBER | FUNCTION |
|------------|----------------------|
| 1 | bCAL_in/CAL_in |
| 2 | UART_R/T |
| 3 | UART_TXD |
| 4 | UART_RXD |
| 5 | DVCC_out (3.3 V) |
| 6 | Vin_(4.5 V to 5.5 V) |
| 7 | GND |
| 8 | Alarm output |
| 9 | PWM output |

WARRANTY/REMEDY

Honeywell warrants goods of its manufacture as being free of defective materials and faulty workmanship during the applicable warranty period. Honeywell's standard product warranty applies unless agreed to otherwise by Honeywell in writing; please refer to your order acknowledgment or consult your local sales office for specific warranty details. If warranted goods are returned to Honeywell during the period of coverage, Honeywell will repair or replace, at its option, without charge those items that Honeywell, in its sole discretion, finds defective.

The foregoing is buyer's sole remedy and is in lieu of all other warranties, expressed or implied, including those of merchantability and fitness for a particular purpose. In no event shall Honeywell be liable for consequential, special, or indirect damages.

While Honeywell may provide application assistance personally, through our literature and the Honeywell web site, it is buyer's sole responsibility to determine the suitability of the product in the application.

Specifications may change without notice. The information we supply is believed to be accurate and reliable as of this writing. However, Honeywell assumes no responsibility for its use.

WARNING **PERSONAL INJURY**

DO NOT USE these products as safety or emergency stop devices or in any other application where failure of the product could result in personal injury.

Failure to comply with these instructions could result in death or serious injury.

WARNING **MISUSE OF** **DOCUMENTATION**

- The information presented in this product sheet is for reference only. Do not use this document as a product installation guide.
- Complete installation, operation, and maintenance information is provided in the instructions supplied with each product.

Failure to comply with these instructions could result in death or serious injury.
